

You started something. Nothing is happening.

Nobody bought it. Or one person bought it and that was the end of it. Or you did the math and there was nothing left over.

This book is about that wall. The six you meet after starting, the moats you can build with no money, and why the thing that breaks a teenager's business is usually too many orders.

It ends with the chapter nobody writes: how to quit well.

AGES 12-18

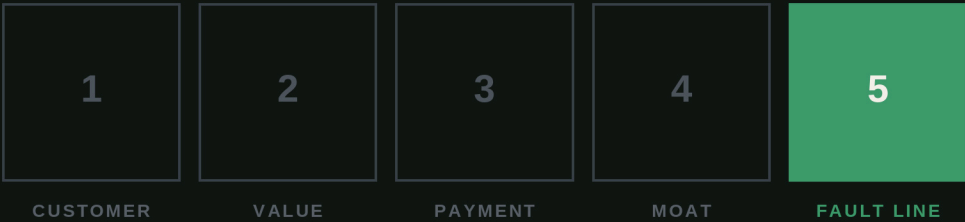

I Started. So Why Isn't It Working?
